

Den Durchblick zu halten wenn es um die richtige Wahl des Kunststoffes geht, ist keine einfache Aufgabe. Jedes Teil, das im Spritzgiessverfahren hergestellt wird, erfordert individuelle Eigenschaften. Sie und Ihr Produkt stehen im Zentrum unseres Interesses.

Die nachfolgende Übersicht, soll Ihnen ein Beispiel geben, welche Handelsnamen heutzutage auf dem Markt verfügbar sind. Welches von den Produkten, das richtige für Ihre Kunststoffanwendung ist, ist nur herauszufinden in einem persönlichen Gespräch.

Denn nur bei Teilen, dessen thermische, chemische, elektrische und mechanische Eigenschaften Ihren Anforderungen entsprechen, dürfen wir auf eine dauerhafte Geschäftspartnerschaft hoffen.
