Product Information INFINAM® PA 6005 P

POLYAMIDE-6X POWDER FOR ADDITIVE FABRICATION PROCESSES

INFINAM® PA 6005 P is a natural colored fine powder especially for the use in additive fabrication. Our product is suitable for manufacturing of functional prototypes, manufacturing of individual units as well as serial parts. INFINAM® PA 6005 P is especially suitable for powder bed fusion technologies.

Features

- High temperature resistance
- Exploitable on common systems for powder-based additive fabrication
- Easy-to-process
- High process stability
- Low water uptake
- Excellent mechanical properties
- Excellent surface resolution and feature detail
- Nice surface finish
- Good resistance against numerous chemicals

The features and properties presented are to be understood as typical and are intended for reference and comparison purposes only. Due to layer-wise construction and by variation of processing conditions the actual properties of components from additive processes will vary. Due to process-related deviations the user is responsible to ensure the characteristic values required for the respective use and to carry out additional application-related tests if necessary.
